Plume Moth Stick Craft

Materials needed:
- Chopsticks or any straight piece of wood
- Paper (regular or parchment)
- Rubber band
- Scissors
- Tape

Step 1: Fold approximately 1 inch of the paper along the long edge. Then flip it over and fold again. Keep doing this until you have run out of paper and you have a folded fan or accordion.

Step 2: Fold the closed paper in half the short way and cut a ¼ in slit for the stick.

Step 3. Insert the chopstick into the slit.

Step 4. Cut the rubberband in half and tape the center of the rubberband to the top of the chopstick. The tape can also overlap on the paper.

Step 5: Cut along the edges of the paper for about 3 inches on both edges on both sides to give the shape of a feather.

Optional: Put a piece of tape or a rubberband around the chopstick below the wings where the paper intersects. Add 6 legs using additional cut rubber bands or paper.

You now have a slim plume moth that you can decorate or use as a puppet. Enjoy!
